Profile

Diligent worker with two years of busy season experience in tax and audit. Recently launched a new college ministry at University of Oregon, a prestigious university. Transitioned to a Data Analyst career because of my interest in transforming data to help businesses make more efficient decisions. Industry experience includes: financial institutions, nonprofits, healthcare, and agriculture.

Skills

- SQL (PostgreSQL)
- Python
- Excel
- Power BI
- Tableau
- Git/GitHub

Data Analytics Experience

Nashville Software School

Data Analyst Apprentice

September 2022 - Present

Full-time Bootcamp that emphasized learning the data analysis process to make informed decisions and how to present your findings.

- Wrote complex queries to transform data in efficient ways through SQL and Python
- Utilized Excel to analyze data through lookups, pivot tables, and PowerPivot
- Built and presented dashboards through Power BI
- Completed projects as an individual and as a team by using real-world datasets
- Experience being a team-lead with efficient communication to complete analysis projects

Projects

Lahman Baseball Project (PostgreSQL)

- Dataset includes roughly 150 years worth of baseball statistics and 27 different tables
- Utilized joins and CTE's to see if there is a correlation between home-game attendance and total wins

Prescription Drugs Project (PostgreSQL)

- Dataset includes 8 tables of prescription drug information with who prescribed it and how much
- Utilized joins to discover which prescriber prescribed the most opioids along with the total claim count of the different drugs
